Tableau

Tableau table of contents:

Topics	Sub Topics
Introduction	
	Introduction to visualization
	Tableau Overview
	Installation
Tableau Basics	
	Business Challenge
	Connecting tableau to data file - CSV File
	Navigating tableau
	Creating calculated fields
	Adding colors
	Adding Labels and formatting
	Exporting your worksheet
	Get the Viz
Time series, Aggregation and Filters	
	Introduction to Aggregation and time series
	Working with data extracts in tableau
	Working with time series
	Understanding Aggregation, Granularity and Level of detail
	Creating an Area chart & learning about highlighting
	Adding a filter and Quick filter
Maps, scatterplots, Your first dashboard	

	Section Introduction
	Joining data in Tableau
	Creating a map, working with hierarchies
	Creating a scatterplot, applying filters to multiple worksheet
	Let's create our first dashboard
	Adding an interactive action- filter
	Adding an interactive action- highlighting
Joining and blending data, PLUS dual axis chart	
	Section Introduction
	Joins basics
	Joins with duplicate values
	Joining on multiple fields
	The showdown: Joining data vs Blending data in tableau
	Data blending in tableau
	Creating calculated fields in blend
	Section Recap
Table calculation, Advanced dashboard, story-telling	
	Section Introduction
	Downloading the data and connecting to tableau
	Mapping- How to set geographical role
	Creating table calculation for Gender
	Creating bins and distribution for age
	Leveraging the power of parameters
	How to create tree map chart
	Creating customer segmentation dashboard
	advanced dashboard interactivity
	Analysing the customer segmentation dashboard

	Creating a storyline
Advanced data preparation	
	Section Introduction
	What format your data should be in
	Data interpreter
	Pivot
	Splitting a column into multiple Columns
	Metadata grid
	Fixing Geographical errors in tableau
What's new in tableau 10	
	Section Introduction
	The challenges: Startup expansion analysis
	Custom territories via Groups
	Custom territories via Geographical roles
	Adding a highlighter
	Clustering in Tableau
	Cross database joins
	Modelling with clusters
	Saving your clusters
	New Design features
	New Mobile features
Group and sets	
	Section Introduction
	Project brief: 1000 startup
	Working with group
	Creating a static set
	Creating a dynamic set

	Combining sets
	Controlling sets with parameters
	Dashboard: The startup Quadrant
	Dashboard tricks
Advanced table calculation	
	Section Introduction
	Project brief: Coal terminal utilization analysis
	Creating multiple joins in tableau
	Calculated fields Vs table calculation
	Creating advanced table calculation
	Saving a quick table calculation
	Specifying direction of computation
	Writing your own table calculation
	Adding a second layer moving average
	Quality assurance for table calculation
	Trendline for power - insights
	Creating a storyline
	Exclusive report is ready
Advanced data preparation and analytics in tableau	
	Section Introduction
	Project Brief: Retail sector forecasts
	Building box plots in tableau
	Analysing box plots
	Working with large data source
	Pivot and split
	What does real retail world look like
	Primary use case for data source filters

	Trendlines
	Data prep exercise
	Advanced time series blending
	Calculating sales per capita
	Forecasting in tableau
	How to present a storyline
Creating Animation in tableau	
	Section Introduction
	Project brief: World health trends
	Editing blending relationships
	Building visualization
	Adding animation
	Manual sorting blending data
	Leaving trial in your animated data
	Finalizing your dashboard
Level of detail Calculation (LOD)	
	Section Introduction
	Project brief: Regional profit analysis
	Preparing the workbook
	Aggregation and granularity (Refresher)
	LOD calculation Intuition
	LOD Type1: Include
	Understanding ATTR in tableau
	LOD Type2: exclude (PART 1)
	LOD Type2: exclude (PART 2)
	Multiple fields in LOD Calculation
	LOD Type 3: FIXED
	Finalizing the visualisation
